Solder wire IF 1000M

Lead-free, rosin based, activated no-clean solder wire

**Description:**
Interflux® **IF 1000M** is a no-clean solder wire that has been developed to give increased wetting on surfaces that are difficult to solder, e.g. OSP, Ni, Zn, messing, German silver,... as well as on degraded and oxidised surfaces.

The solder wire contains a collophony based body that has been designed to enhance spreading of the solder on solderable surfaces.

**IF 1000M** is useable in both hand soldering and automated soldering processes.

Depending on the temperature settings, residues can vary from transparent to amber.

**Availability**

**Flux type:** IF 1000M  
**Flux content:** 2,2 — 3,5% w/w

= upon request

The solder wire contains halogens and is classified as RO L1 according to IPC and EN-standards.

**More information:**
- Work instructions 2  
- Handling 2  
- Test results 3  
- Packaging 4

**Key advantages:**
- Increased wetting properties on surfaces that are difficult to solder.  
- Suitable for automated soldering  
- RO L1
Work instructions

Manual soldering
The advised working temperature is between 360°C and 390°C. For more dense metals like Nickel, the temperature may be elevated to 420°C.

The use of a good soldering station is important. Use a soldering station with a short response time and with enough power for your application.

Choose the correct soldering tip: to reduce the thermal resistance, it is important to create a large contact area with the surfaces to be soldered.

Heat up both the surfaces simultaneously. Slightly touch with the solder wire, the point where soldering tip and the surfaces to be soldered meet (the small quantity of solder ensures a drastic lowering of the thermal resistance). Add subsequently without interruption, the correct amount of solder close to the soldering tip without touching the tip. This will reduce the risk on flux spitting and premature flux consumption!

Handling

Storage
Store the solder wire in a clean environment at ambient temperature.

Handling
To avoid spool and wire damage, handle package with care.

Safety
Please always consult the safety data-sheet of the product.
## Test results
conform EN 61190-1-3(2007) and IPC J-STD-004(A)
